

AppStream Engineering Labs - Desktop Client Instructions

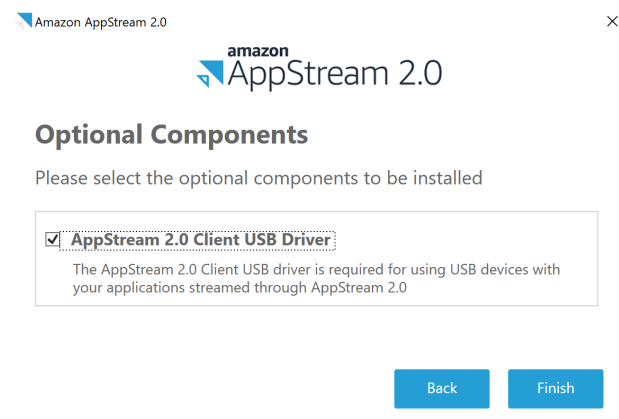

-Complete instructions from Amazon regarding the Desktop Client are located here:
<https://docs.aws.amazon.com/appstream2/latest/developerguide/client-application-windows-user.html>

-The AppStream desktop client is available for Windows only.

-Download and Install the client from here: <https://clients.amazonappstream.com/>

-Install the client, allowing for USB connections if you would like to be able to natively use USB devices in your AppStream Instance:

-Use the following URL in the client's URL field: <https://tcnj.edu/engineeringlabs>

-The Connect button will turn blue and you may click connect to start your session:
